

COATING for your glassware

A new application for your glassware: **COATING**

The advantages:

Our **COATING** has an **excellent mechanical resistance**.

✓ The thermal application of this TEFLON covering makes it so that the coating adheres perfectly on the glass whilst conserving its elastic qualities. This will avoid the spread of the content in case of damage while guaranteeing the safety of the user.

Our **COATING** has a **good thermal resistance**.

✓ The maximum temperature of use is 260°C.

Our **COATING** is **transparent**.

✓ Your glassware maintains its first quality: the transparency.

Our **COATING** is **dry**.

✓ The surface of the **COATING** is perfectly dry, which prevents dust from sticking to it.

Our **COATING** adapts **to all kinds of shapes**.

✓ Every type of glassware can be covered entirely with a **COATING** covering.
